Chapter 7. Cucurbit Production[1]

Craig Frey, Nathan S. Boyd, Qingren Wang, Johan Desaeger, Jawwad Qureshi, Anna Mészáros, Nicholas S. Dufault, Pamela D. Roberts, and Xavier Martini[2]

Botany and Planting

Angled or ridged luffa (silk squash, Chinese okra)—*Luffa acutangula*

Bittermelon (Chinese and Indian types)—*Momordica charantia*

Butternut squash—*Cucurbita moschata*

Cantaloupe—*Cucumis melo*

Chayote—*Sechium edule*

Chinese cucumber—*Trichosanthes kirilowii*

Cucumber—*Cucumis sativus,* Cucurbitaceae

Fuzzy melon (immature fruit) and **Winter melon**—*Benincasa hispida*

Long gourd (oopoh)—*Lagenaria siceraria*

Pumpkin (jack-o-lantern is *C. pepo*; some processing pumpkins are *C. maxima* and *C. moschata*)

Smooth luffa—*Luffa aegyptica* (cylindrical)

Snake gourd—*Trichosanthes cucumerina*

Summer squash (crookneck and straight-neck yellow squash)—*Cucurbita pepo*

Tropical pumpkin (calabaza)—*Cucurbita moschata*

Watermelon—*Citrullus lanatus*

Winter squash—*Cucurbita maxima*

Zucchini—*Cucurbita pepo*

Table 1. Planting dates for cucurbits.

Planting Region	Dates				
	Cucumber	Cantaloupe	Pumpkin	Squash	Watermelon
North Florida	Feb–Apr; July–Aug	Feb–Apr	Early July	Feb–Apr; Aug–Sept	Feb–Apr
Central Florida	Jan–Mar; Sept	Jan–Mar	Mid-July	Jan–Apr; Aug–Sept	Jan–Mar
South Florida	Sept–Feb	Dec–Mar	Early August	Aug–Mar	Dec–Mar

Table 2. Planting information for cucurbits.

NR = Not Recommended						

Cultivars

Table 3. Cultivars for cantaloupe.

Cantaloupe	Cultivars
Eastern Shipper	Accolade (H), Ariel (H), Athena (H), Atlantis (H), Avatar (H)
Harper Type	Caribbean Gold (H), Damaris (H), Infinite Gold (H), Timeless Gold (H)
Calabaza (Tropical Pumpkin)	Agriset 9001 (vining type), La Estrella (compact plant)
H=hybrid	

Table 4. Cultivars for cucumber.

Cucumber	Cultivars
Pickling	Calypso (H) (GY), Deli King, Deli Star, Excursion, Expedition (H), Jackson Classic (H) (GY), Jackson Supreme, Maxi Pack (H), Maxi Pick (H), Powerpak (H) (GY), Supremo (H)
Slicing	Bristol, Cobra (H) (GY), Diamondback (H), Dominator (H) (GY), Impact (H) (GY), Mamba (H) (GY), Mongoose (H) (GY), Python (H), Speedway (H) (GY), SV3462CS* (H) (GY), SV4719CS* (H) (GY)
H=hybrid; flower habit: GY=gynoecious *Improved downy mildew resistance	

Table 5. Cultivars for Halloween pumpkin (north Florida only).

Halloween Pumpkin (by size)	Cultivars
Miniature: <1 lb	Bumpkin (H), Gold Dust (H), Jill-Be-Little, Wee-Be-Little (PVP)
Small: 1–5 lb	Hybrid Pam (H), Pick-A-Pie (H), Small Sugar
Medium: 5–10 lb	Autumn Gold (H), Goose Bumps II (H), Jack of All Trades (H), Knucklehead (H), Merlin (H), October (H)
Large: 10–20 lb	Apogee (H), Connecticut Field, Early Giant (H), Early King (H), Magician (H), Magic Wand (H)
Giant: 25–80 lb	Dill's Atlantic Giant, Prizewinner (H)
PVP=Plant Variety Protection; H=hybrid	

Table 6. Cultivars for squash.

Squash	Cultivars
Summer (yellow)	Conqueror III (H) (SN)*, Enterprise (H) (SN), Fortune (H) (SN), Gentry (H) (CN), Goldprize (H) (SN), Gold Star (H) (CN), Grand Prize (H) (SN), Lazor (H) (SN), Lioness (H) (SN), Smooth Criminal (H) (SN)
Acorn	Mesa Queen (H), Royal Ace (H), Table Ace (H), TayBelle PM (H)
Butternut	Atlas (H), Avalon (H), Butternut (H), Canesi (H), Early Polaris (H), Quantam (H), Ultra (H), Waltham, Zenith (H)
Summer (zucchini)	Cash Machine, Everglades (H), Green Machine (H), Pascola (H), Paycheck (H), Payload (H), Payroll (H), Renegade (H), Respect (H), Senator (H), Spineless Beauty (H), Spineless King (H), Spineless Perfection (H)
Summer (yellow zucchini)	Golden Delight (H) (SN), Golden Glory (H) (SN), Goldrush (H) (SN)
H=hybrid; type: CN=crookneck, SN=straightneck *Biotech: Specific requirements and restrictions apply to these products.	

Table 7. Cultivars for watermelon.

Watermelon	Cultivars
Diploid	Estrella (H), Jamboree (H), Mardi Gras (H), Sangria (H), Sentinel (H), Starbrite (H), Stargazer (H), SSX 8585 (H), Summer Flavor 720, Summer Flavor 790 (H), Summer Flavor 800 (H), Summer Flavor 8490 (H), Summer Flavor 860, Top Gun (H)
Triploid (seedless, large)	ACX 6177 (H), Black Jack (H), Bottle Rocket (H), Captivation (H), Crisp N' Sweet (H), Crunchy Red (H), Embassy (H), Exclamation (H), Excursion (H), Fascination (H), Joy Ride (SV 8298) (H), Kingman (H), Melody (H), Red Amber (H), Red Garnet (H), Road Trip (H), Secretariat (H), SS 7167 (H), SS 7177 (H), SS 7187 (H), SS 7197 (H), Sugared (H), Sugar Heart (H), Sweet Gem (H), Sweet Polly (H), Talca (H), Traveler (H), Troubadour (H), Warrior (nun 1009) (H)
Non-harvestable Pollenizer	Ace Plus, Co-Pilot, Minipol, Polimax, Premium, SP-6, SP-7, Wildcard Plus, Wingman
Triploid (seedless, mini)	Ana (H), Belmont (H), Excite (H), Extazy (H), Leopard (H), Ocelot (H), Promesa (H), Sirius (H)
H=hybrid	

Asian Cucurbits

This group includes cucurbit fruits that can be eaten immature like several other vegetables with edible tender stems and leaves. Matured luffa are not edible, but after peeling off their skin and drying them, they can be used as durable scrubs for dishwashing or showering. All these Asian cucurbits can be grown on raised beds, with or without plastic mulch, and with drip, overhead, or subsurface irrigation. Most are well trellised to support the long vines and fruits, primarily to maximize space and receive sufficient sunlight, to minimize bud drop and fruit rot caused by overshading and exposure to soil moisture and pathogens, and to promote straight fruit. Winter melon is the exception because it is generally too heavy to trellis. Fertilizer recommendations for cucumbers are applicable for fuzzy melon, long gourd, both luffas, Chinese cucumber, bittermelon, and snake gourd. There are two types of bittermelon: Indian and Chinese. The Indian type has smaller fruit with dark-green color and soft, prickled skin. The Chinese type has longer, larger fruit with light-green color and smooth skin. The Indian type tastes more bitter than the Chinese type. Chinese cucumber, though rarely commercially available, has fruit more than 1 foot long with dark-green color, very thin and rough skin, and crisp texture, similar to European cucumber but crunchier. Recommendations for watermelon should be followed for winter melon and chayote. With the exception of chayote, where the entire fruit is planted, these crops are started from seed and grown as transplants prior to being set in the field.

Table 8. Planting dates for Asian cucurbits.

Planting Region	Dates

Seed per acre	–	–	–	–	–	–	2904—whole fruit	–

Table 10. Cultivars for Asian cucurbits.

Asian cucurbits	Cultivars
Bittermelon (Chinese)*	Hong Kong Green, Hybrid Bangkok Large, Japan Green Sprindle, Taiwan Large
Bittermelon (Indian)*	Hybrid India Star, India Green Long, India Green Queen, Palee
Winter Melon	Giant Wax, Hybrid Red Doll, Hybrid Small Round, Hybrid Wonder Wax, Round Tong Gwa
Snake Gourd*	Buag Ngu, Extra Long Dancer, Hybrid Snaky, Long EX, Polo
Angled Luffa*	Bonanza, Buam Liam Hybrid, Hybrid Green Glory, Lucky Boy, Summer Long
Smooth Luffa*	Dok Hybrid, Hybrid Smooth Beauty, Smooth Boy
Long Gourd*	Bitter Gourd Long, Hybrid Asia Short, Hybrid India Long
Fuzzy Melon*	Chiang Shin Joker, Mokwa, Mokwa Long, Seven Star Long
Chayote*	The seed is the viviparous fruit itself. There is some debate as to whether varieties remain true. Fruit purchased from grocery stores may not sprout.
*Should be trellised	

The following tables list registered pesticides that should be integrated with other pest management methods. Additional information on integrated management methods can be requested from UF/IFAS Extension horticulture or agriculture agents. A list of local UF/IFAS Extension offices is available at https://sfyl.ifas.ufl.edu/find-your-local-office/.

Table 11. Herbicides approved for managing weeds in cucurbit crops. **Labels change frequently. Be sure to read a current product label before applying any chemical.** Contact: Nathan Boyd, UF/IFAS Gulf Coast Research and Education Center.

	Active Ingredient lb a.i./Acre	Trade Name Product/Acre	MOA Code	Crops	Weeds Controlled/Remarks
PREEMERGENCE	**Bensulide** 5.0–6.0	(Prefar) 4 E 5–6 qt	8	All cucurbits	Annual broadleaf and grass control. Incorporate or irrigate 1–2 in. within 36 hr of application. Non-labeled crops should not be planted within 120 days of application.
	Carfentrazone up to 0.031	(Aim) 2.0 EC up to 2 fl oz	14	All cucurbits	Apply as a preplant burndown for emerged broadleaf weeds. Use crop oil concentrate, methylated seed oil, or nonionic surfactant at recommended rates. No more than 0.096 lb a.i./A per season. No pretransplant interval.
	Clomazone 0.15–0.38	(Command) 3 ME 0.4–1 pt	13	Cucumber	Annual broadleaf and grass weeds. Use lower rates on coarse soils. Read label for additional restrictions. PHI 30 days.
	Clomazone 0.15–0.25	(Command) 3 ME 0.4–0.67 pt	13	Muskmelon, watermelon	Annual broadleaf and grass weeds. Use lower rates on coarse soils. Read label for additional restrictions.
	Clomazone 0.25–0.50	(Command) 3 ME 0.67–1.33 pt	13	Summer squash	Annual broadleaf and grass weeds. Broadcast for bare-ground production; row middles only if growing on plastic. PHI 30 days.
	Clomazone 0.25–0.75	(Command) 3 ME 0.67–2 pt	13	Winter squash	Annual broadleaf and grass weeds. Broadcast for bare-ground production; row middles only if growing on plastic. Read labels for cultivar restrictions. PHI 45 days.
	Ethalfluralin + Clomazone 0.4–0.6 + 0.13–0.19	(Strategy) 2–3 pt	3 + 13	Cucumbers, melons, summer and winter squash, pumpkin, watermelon	Annual broadleaf and grass control. Must be applied no later than 2 days after seeding. Overhead irrigation or rainfall of 0.5 in. within 5 days. Do not apply under plastic mulch or over top of plants.
	Flumioxazin up to 0.125	(Chateau) EZ up to 4 fl oz	14	Cucumber, muskmelon, watermelon, pumpkins, summer and winter squash	Broadleaf and grass control. Row middles only. Do not apply after crops are transplanted/seeded. Label is a Third-Party Registration (TPR, Inc.). Use without a signed authorization and waiver of liability is a misuse of the product.
	Glufosinate up to 0.79	(Rely) 280 43 oz	10	Muskmelon, watermelon, cucumber, pumpkin, summer and winter squash, and others on label	Burndown of emerged broadleaves, grasses, and nutsedge. May be applied as a preplant burndown and preplant to plastic mulch covered beds. See label for planting intervals. 30-day PHI for melons. 14-day PHI for cucumbers, gourds, pumpkins, and squash. Note: Rely 280 label is still valid for use if the applicator has product on hand. Registration has since moved to the Liberty label through December 2026 for row middle weed management in cucurbits.

	Active Ingredient lb a.i./Acre	Trade Name Product/Acre	MOA Code	Crops	Weeds Controlled/Remarks
	Glyphosate	(various formulations) consult labels	9	All cucurbits	Controls emerged broadleaf, grass weeds, and nutsedge. Consult individual labels for restrictions.
	Halosulfuron 0.024	(Sandea) 75 DG 0.5 oz	2	Cantaloupe, cucumber, crenshaw, honeydew	Yellow and purple nutsedge and broadleaf control. Apply after seeding but before soil cracking on bare ground or prior to laying the plastic mulch. Apply uniformly with ground equipment in a minimum of 15 gal of water per acre.
	Halosulfuron 0.024–0.036	(Sandea) 75 DG 0.5–0.75 oz	2	Watermelon	Yellow and purple nutsedge and broadleaf control. May be applied preemergence to seeded watermelon on bare ground or preseeding to mulch-cultured watermelon. Transplanting should be no sooner than 7 days after application. Use lighter rates on sandy soils with low organic matter.
	Halosulfuron 0.024–0.036	(Sandea) 75 DG 0.5–0.75 oz	2	Pumpkin, winter squash	Yellow and purple nutsedge and broadleaf control. Apply before soil cracking or pretransplant. Transplanting should not be made sooner than 7 days after application. May be applied POST over the top when plants reach the 4–5 true-leaf stage, but before first female flowers appear.
	Paraquat 0.63–0.94	(Gramoxone) 2 SL 2–4 pt (Firestorm) 3 SL 1.3–2.7 pt	22	Cucumber, muskmelon, cantaloupe, pumpkin, squash, watermelon	Controls emerged weeds. Apply prior, during, or after planting, but before crop emergence. Use a nonionic surfactant. Consult label for new restrictions.
	Pelargonic acid	(Scythe) 4.2 EC 3%–10% v/v	27	All cucurbits	Controls emerged weeds. Apply before crop emergence. Product is a contact, nonselective, foliar-applied herbicide. There is no residual activity. May be tank-mixed with soil residual herbicides.
	Pendimethalin 1.0	(Prowl H20) 2.1 pt	3	Cantaloupe, citron melon, muskmelon, watermelon	Annual broadleaf and grass weeds. Apply to the row middles only. May be applied as a sequential application with 2.1 pt/A before and 2.1 pt/A after transplanting or seeding, with 21 days between applications. No more than 4.2 pt/A per season.
	S-metolachlor 0.95–1.26	(Brawl, Dual Magnum) 1.0–1.33 pt	15	Pumpkin	Annual broadleaf and grass weeds and nutsedge control. Apply as inter-row or inter-hill application. Leave a 1-ft untreated area over the seeded row (6 in. on either side of the row). Use lower rates on lighter soils. Apply before weeds emerge.

	Active Ingredient lb a.i./Acre	Trade Name Product/Acre	MOA Code	Crops	Weeds Controlled/Remarks
POSTTRANSPLANT/ POSTEMERGENCE	**Carfentrazone** up to 0.031	(Aim) 2.0 EC up to 2 fl oz	14	All cucurbits	Emerged broadleaf control. Post-direct hooded application to row middles for burndown of emerged broadleaf weeds. Use crop oil concentrate or nonionic surfactant at recommended rates. PHI 0 days.
	Clethodim 0.09–0.13 0.07–0.12	(Arrow) 2 EC 6–8 oz (Select Max) 1 EC 9–16 fl oz	1	Cucumber, squash, melons, and all commodities in crop group	Annual and perennial grass control. Use a crop oil concentrate at 1% v/v spray volume. Use nonionic surfactant in Select Max. PHI 14 days.
	Ethalfluralin + Clomazone	(Strategy) 2–3 pt	3 + 13	Cucumber, melon, summer and winter squash, pumpkin, watermelon	Annual broadleaf and grass control. After transplanting apply to row middles only. Does not control emerged weeds. PHI 45 days.
	Glufosinate up to 1.24	(Rely) 280 64 fl oz	10	Muskmelon, watermelon, cucumber, pumpkin, summer squash, winter squash, and others on label	Burndown of emerged broadleaves, grasses, and nutsedge. May be applied with a shielded applicator between rows of established cucurbits. 30-day PHI for melons. 14-day PHI for cucumbers, gourds, pumpkins, and squash. Note: Rely 280 label is still valid for use if the applicator has product on hand. Registration has since moved to the Liberty label through December 2026 for row middle weed management in cucurbits.
	Glyphosate	(various formulations) consult labels	9	All cucurbits	Control emerged broadleaf and grass weeds. Apply to row middles only. Use a hooded sprayer to reduce drift. Read individual labels for restrictions.
	Halosulfuron 0.04–0.05	(Sandea) 75 DF 0.5–1 oz	2	Cucumber, cantaloupe, honeydew, crenshaw melon	Apply after the 3–5 true leaf stage (no sooner than 14 days after transplanting) but before the first female flower. Spot spray a POST application if a PRE application was made. Cucumber PHI 30 days. Cantaloupe, honeydew, crenshaw 57 days.
	Halosulfuron 0.02–0.05 0.02–0.04	(Sandea) 75 DF 0.5–1.0 oz 0.5–0.75 oz	2	Watermelon, summer squash, pumpkin, winter squash	Nutsedge and broadleaf weeds. Apply to the row middles only. Include a NIS in the spray solution. PHI 57 days for watermelon. PHI 30 days for summer/winter squash and pumpkin.
	Imazosufuron 0.19–0.3	(League) 75 WG 4–6.4 oz	2	Muskmelon, watermelon	Nutsedge and broadleaf weeds. No more than 6.4 oz/A per year. No more than 1 application per year. Surfactant is needed if weeds have emerged. Row middles only. PHI 45 days.

	Active Ingredient lb a.i./Acre	Trade Name Product/Acre	MOA Code	Crops	Weeds Controlled/Remarks
	Paraquat 0.47–0.93	(Gramoxone) 2 SL 1.88–3.72	22	Cucumber, muskmelon, cantaloupe, pumpkin, squash, watermelon	Controls emerged weeds. Row middles only. No more than 3 applications per year. Gramoxone SL is a supplemental label. Consult labels for other paraquat formulations. Consult label for new restrictions.
	Pelargonic acid	(Scythe) 4.2 EC 3%–10% v/v	27	Cucumber, gourd, muskmelon, cantaloupe, pumpkin, squash, watermelon	Controls emerged weeds. Row middles only. Use a shielded sprayer directed to the row middles to reduce drift to the crop.
	Pendimethalin 1.0	(Prowl H20) 2.1 pt	3	Cantaloupe, citron melon, muskmelon, watermelon	Annual broadleaf and grass weeds. Apply to the row middles only. Apply 2.1 pt/A after transplanting or seeding and before vines are off the bed and in the spray area. If a preplant application was applied, no more than 4.2 pt/A per season. PHI 35 days.
	Sethoxydim 0.19–0.28	(Poast) 1.5 EC 1.0–1.5 pt	1	All cucurbits	Growing grass weeds. Include a crop oil concentrate. Efficacy is decreased if weeds are under stress. Use 1 pt for seedling grasses and 1.5 pt on perennial grasses. PHI 14 days.
	S-metolachlor 0.95–1.26	(Brawl, Dual Magnum) 7.62 EC 1.0–1.33 pt	15	Pumpkin	Annual broadleaf and grass weeds and nutsedge. Apply as inter-row or inter-hill application. Leave a 1-ft untreated area over the plant (6 in. on either side of the row). Use lower rates on lighter soils. Apply before weeds emerge. PHI 30 days.
	Terbacil 0.1–0.2	(Sinbar) 80 WP 2–4 oz	5	Watermelon	Annual broadleaf weeds. Apply to row middles only. Do not allow contact with plant foliage. No more than 4 oz per year. PHI 70 days.
	Trifluralin	(Treflan) 4 EC 1.0 pt (Treflan) TR 10 5 lb	3	All cucurbits	Annual broadleaf and grass control. Apply after crop is 3–4 true leaf stage. Row middles only. PHI 30 days except for watermelon 60 days.
POSTHARVEST	**Diquat** 0.25	(Reglone Dessicant) 1.0 pt	22	Cantaloupe	No more than 35 gal/A. Include an NIS. Thorough coverage is required.
	Diquat 0.38	(Reglone Dessicant) 1.5 pt	22	Cucumber, watermelon, squash (except acorn)	No more than 35 gal/A. Include an NIS. Thorough coverage is required.
	Diquat 0.5	(Reglone Dessicant) 2.0 pt	22	Squash (acorn)	No more than 35 gal/A. Include an NIS. Thorough coverage is required.

Table 12. Insecticides labeled for management of arthropod pests of cucurbit crops. **Labels change frequently. Be sure to read a current product label before applying any chemical. Please refer to chapter 19 for information on biopesticides, including materials labeled for certified organic production.** Contact: Xavier Martini, UF/IFAS North Florida Research and Education Center—Quincy, or Jawwad Qureshi, UF/IFAS Southwest Florida Research and Education Center.

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]
			Appl.	Season[2]			
Aphids	1A	***Lannate LV** (methomyl)	1.5–3 pt	18 pt	48	3	No more than 12 applications per year.
	1A	***Lannate SP** (methomyl)	0.5–1 pt	6 pt	48	3	No more than 12 applications per year.
	1A	***Vydate L** (oxamyl)	2–4 pt	16 pt	48	1	Reapplications at least 7 days apart.
	1B	**Dimethoate 4 EC** (dimethoate)	Melons: 1 pt Watermelons: 0.5–1 pt	2 pt per year	48	3	Highly toxic to bees. Not for squash or cucumber.
	1B	**Malathion 5EC** **Malathion 8** (malathion)	**5EC:** 1.5–2.8 pt (cucumber), 2.0–2.8 pt (summer squash), 1.6 pt (winter squash), 1.5–2.5 pt (watermelon), or 1.6 pt (melon) **8:** 1.75 pt (summer squash, winter squash, cucumber)	**5EC:** 5.6 pt (cucumbers), 8.4 pt (summer squash), 4.8 pt (winter squash), or 5 pt (watermelon) **8:** 3.5 pt (cucumber) or 5.25 pt (summer squash, winter squash)	24	1	**5EC:** No more than 2 applications per year. **8:** Squash and cucumbers only.
	3A	***Athena** (bifenthrin)	7–17 fl oz	51 fl oz	12	7	No more than 2 consecutive applications. No more than 2 applications after bloom.
	3A	***Brigade 2 EC** (bifenthrin)	2.6–6.4 fl oz	19.2 fl oz	12	3	No more than 2 applications after bloom. Highly toxic to foraging bees.
	3A	***Danitol 2.4 EC** (fenpropathrin)	10.67–16 fl oz	42.67 fl oz	24	7	Highly toxic to foraging bees. Can be tank-mixed with 3–4 oz of Belay insecticide.
	3A	***Hero** (bifenthrin + zeta-cypermethrin)	4–10.3 oz	41.2 oz	12	3	No more than 4 applications per season. Reapplications at least 10 days apart.

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]
			Appl.	Season[2]			
	4A + 28	**Voliam Flexi** (thiamethoxam + chlorantraniliprole)	4–7 oz	14 oz	12	1	–
	4C	**Closer SC** (sulfoxaflor)	1.5–2.0 fl oz	17 fl oz	12	1	Highly toxic against pollinators: Notify known beekeepers within 1 mile of the treatment area. Limit application to times when managed bees and native pollinators are least active.
	4D	**Sivanto Prime** (flupyradifurone)	Foliar: 7–14 fl oz Soil: 21–28 fl oz	Foliar: 28 fl oz Soil: 28 fl oz per crop season	4	Foliar: 1 Soil: 21	Foliar: Reapplications at least 7 days apart. Soil: No more than 3 crop seasons per year.
	6 + 28	***Minecto Pro** (abamectin + cyantraniliprole)	10 fl oz	20 fl oz	24	7	Highly toxic to pollinators. Do not spray during bloom.
	9B	**Fulfill** (pymetrozine)	2.75 oz	5.5 oz	12	0	Reapplications at least 7 days apart.
	9B	**PQZ** (pyrifluquinazon)	2.4–3.2 fl oz	9.6 fl oz	12	7	Reapplications at least 7 days apart.
	9D	**Sefina Inscalis Insecticide** (afidopyropen)	3.0 fl oz	28 fl oz	12	0	Reapplications at least 7 days apart. No more than 2 consecutive applications. Maintain a 10-ft vegetative filter strip of permanent vegetation between the field edge and aquatic habitat.
	28	**Exirel** (cyantraniliprole)	13.5–20.5 fl oz	61.6 fl oz	12	1	No more than 0.4 lb a.i./A of cyazypyr- or cyantraniliprole-containing products per season, either as foliar or soil applications.
	28	**Verimark** (cyantraniliprole)	At planting: 10–13.5 fl oz Drip chemigation: 10 fl oz	At planting: 13.5 fl oz Drip chemigation: 20 fl oz (or 10 fl oz if at-plant also used)	4	1	Both at-plant and drip chemigation. No more than 2 drip chemigation applications (one if at-plant application used).
	29	**Beleaf 50 SG** (flonicamid)	2.0–2.8 oz	8.4 oz	12	0	Begin applications before pests reach damaging levels.

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]
			Appl.	Season[2]			
Beetles (including cucumber beetle and flea beetle)	1A	**Lannate LV** (methomyl)	1.5–3 pt	18 pt	48	3	No more than 12 applications per year.
	1A	**Lannate SP** (methomyl)	0.5–1 pt	12 pt	48	3	No more than 12 applications per year.
	1A	**Sevin 4F, XLR** (carbaryl)	0.5–1.0 qt	6 qt	12	3	Do not apply when plants are wet. Has been reported to flare mites. Do not apply to plants in bloom.
	1B	**Malathion 5EC** **Malathion 8** (malathion)	**5EC:** 1.5–2.8 pt (cucumber), 2.0–2.8 pt (summer squash), 1.6 pt (winter squash), 1.5–2.5 pt (watermelon), or 1.6 pt (melon) **8:** 1.75 pt (summer squash, winter squash, cucumber)	**5EC:** 5.6 pt (cucumber), 8.4 pt (summer squash), 4.8 pt (winter squash), or 5 pt (watermelon) **8:** 3.5 pt (cucumber), 5.25 pt (summer squash), or 5.25 pt (winter squash)	24	1	**5EC:** No more than 2 applications per year **8:** Squash and cucumbers only.
	3A	***Baythroid XL** (beta-cyfluthrin)	2.4–2.8 fl oz	11.2 fl oz	12	0	Can be used on all cucurbits in crop group 9. Highly toxic to foraging bees.
	3A	***Brigade 2 EC** (bifenthrin)	2.6–6.4 fl oz	19.2 fl oz	12	3	No more than 2 applications after bloom. Highly toxic to foraging bees.
	3A	***Capture LFR** (bifenthrin)	6.8–8.5 fl oz, at planting	8.5 fl oz	12	N/A—applied at planting	At planting, banded over open furrow or in-furrow with seed or transplant.
	3A	***Danitol 2.4 EC** (fenpropathrin)	10.67–16 fl oz	42.67 fl oz	24	7	Highly toxic to foraging bees.
	3A	***Pounce 25 WP** (permethrin)	6.4–12.8 oz	76.8 oz Cantaloupe: 51.2 oz	12	0	Highly toxic to foraging bees.
	3A	**Pyganic Crop Protection EC 5.0** (pyrethrins)	4.5–15.61 oz	15.61 oz	12	0	OMRI-listed.[3] No more than 10 applications per season.
	3A	***Warrior II** (lambda-cyhalothrin)	1.28–1.92 fl oz	11.5 fl oz	24	1	Do not apply to blooming crops.
	3A + 4A	***Endigo ZC** (lambda-cyhalothrin + thiamethoxam)	4.0–4.5 fl oz	19 oz	24	1	–

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]

	3A + 4A	***Endigo ZC** (lambda-cyhalothrin + thiamethoxam)	4–4.5 fl oz	19 fl oz	24	1	–
	3A + 6	***Gladiator** (avermectin B1 + zeta-cypermethrin)	19 fl oz	57 fl oz	12	7	Reapplications at least 7 days apart.
	3A + 28	***Besiege** (lambda-cyhalothrin + chlorantraniliprole)	6–9 fl oz	31 fl oz	24	1	No more than 4 applications per year. Reapplications at least 4 days apart.
	4A	**Assail 30SG** (acetamiprid)	2.5–5.3 oz	26.5 oz	12	0	No more than 5 applications per season. Do not use with other group 4A insecticides. Toxic to foraging bees.
	4A + 28	**Durivo** (thiamethoxam + chlorantraniliprole)	10–13 fl oz	13 fl oz	12	30	–
	4A + 28	**Voliam Flexi** (thiamethoxam + chlorantraniliprole)	4–7 oz	14 oz	12	1	–
	5	**Radiant SC** (spinetoram)	5–10 fl oz	34 fl oz	4	3 Cucumbers: 1	No more than 6 applications. Toxic to bees for up to 3 hr following application.

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]
			Appl.	Season[2]			
	6	***Proclaim** (emamectin benzoate)	3.0–4.8 fl oz	14.4 fl oz	12	7	Apply this product diluted in a minimum volume of 10 gal/A. No more than 2 consecutive applications.
	6 + 28	***Minecto Pro** (abamectin + cyantraniliprole)	5.5–10 fl oz	20 fl oz	24	7	Restrictions exist for this product because of the risk to pollinators.
	11A	**Agree WG** (*Bacillus thuringiensis* subspecies *aizawai*)	0.5–2.0 lb	–	4	0	Apply when larvae are small for best control. OMRI-listed.[3]
	11A	**Biobit HP** (*Bacillus thuringiensis* subspecies *kurstaki*)	0.5–2.0 lb	–	4	0	Treat when larvae are young. Good coverage is essential. Can be used in the greenhouse. OMRI-listed.[3]
	11A	**Crymax WDG** (*Bacillus thuringiensis* subspecies *kurstaki*)	0.5–2.0 lb	–	4	0	Use high rate for armyworms. Treat when larvae are young. Genetically engineered strain of *Bt*-containing toxins from both *Bt kurstaki* and *Bt aizawai* strains. Not for organic production.
	11A	**Deliver** (*Bacillus thuringiensis* subspecies *kurstaki*)	0.25–1.5 lb	–	4	0	Use higher rates for armyworms. OMRI-listed.[3]
	11A	**DiPel DF** (*Bacillus thuringiensis* subspecies *kurstaki*)	0.5–2.0 lb	–	4	0	Treat when larvae are young. Good coverage is essential. OMRI-listed.[3]
	11A	**Javelin WG** (*Bacillus thuringiensis* subspecies *kurstaki*)	0.12–1.50 lb	–	4	0	Treat when larvae are young. Thorough coverage is essential. Use higher rates for armyworms. OMRI-listed.[3]
	11A	**Xentari DF** (*Bacillus thuringiensis* subspecies *aizawai*)	0.5–2.0 lb	–	4	0	Treat when larvae are young. Thorough coverage is essential. May be used in the greenhouse. OMRI-listed.[3]
	15	**Rimon 0.83EC** (novaluron)	12 fl oz	36 fl oz	12	1	Reapplications at least 14 days apart.
	18	**Intrepid 2F** (methoxyfenozide)	4–10 fl oz	64 fl oz	4	3	No more than 4 applications per season.

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]
			Appl.	Season[2]			
	22	**Avaunt** (indoxacarb)	2.5–6.0 oz	24 oz	12	3	Highly toxic to foraging bees. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging in the treatment area. Spray reapplications at least 5 days apart.
	28	**Coragen** (chlorantraniliprole)	Drip: 2.0–7.5 fl oz Soil at planting: 3.5–7.5 fl oz Foliar: 2.0–7.0 fl oz	15.4 fl oz Combined at-plant and drip chemigation soil application: 10 fl oz	4	1	May be applied through drip (chemigation), as well as to soil at planting, or as a foliar spray.
	28	**Exirel** (cyantraniliprole)	7.0–13.5 fl oz	61.6 fl oz	12	1	No more than 0.4 lb a.i./A per crop, either as foliar or soil applications.
	28	**Verimark** (cyantraniliprole)	At planting: 6.75–13.5 fl oz Drip chemigation: 5–10 fl oz	At planting: 13.5 fl oz Drip chemigation: 20 fl oz (or 10 fl oz if at-plant also used)	4	1	Both at-plant and drip chemigation. No more than 2 drip chemigation applications (1 if an at-plant application is used).
Fire ants	6	**Clinch** (Abamectin)	1 lb in broadcast application or 5 tbsp per mount	4 lb	–	0	Do not apply if rainfall may occur in the next 6 hr. Ants need to be actively foraging.
	7A	**Extinguish** (S-methoprene)	0.75 lb	–	4	0	Slow-acting IGR (insect growth regulator). Best applied early spring and fall where crop will be grown. May be applied by ground equipment or aerially.
	7C	**Esteem Ant Bait** (pyriproxyfen)	1.5–2.0 lb	2.0 lb	12	1	Apply when ants are actively foraging.
Leafminers	1A	**Vydate L** (oxamyl)	2–4 pt	12 pt	48	1	Reapplications at least 7 days apart.
	1B	**Dimethoate 4 EC** (dimethoate)	Melons: 1 pt Watermelons: 0.5–1 pt	2 pt per year	48	3	Highly toxic to bees. Not for squash or cucumber.
	3A	***Ambush 25W** (permethrin)	6.4–12.8 oz	1.2 lb Cantaloupe: 0.8 lb	12	0	No more than 8 applications per season. Highly toxic to bees.
	3A	***Athena** (bifenthrin)	13.5–17 fl oz	51 fl oz	12	7	No more than 2 consecutive applications. No more than 2 applications after bloom.
	3A	***Danitol 2.4 EC** (fenpropathrin)	10.67–16 fl oz	42.67 fl oz	24	7	Highly toxic to foraging bees.

Insect or Mite Pest	MOA Code[1]	Trade Name (Active Ingredient)	Max Rate/Acre		REI (Hours)	Days to Harvest	Remarks[3]

	15	**Rimon 0.83EC** (novaluron)	12 fl oz	36 fl oz	12	1	Reapplications at least 14 days apart.
	16	**Courier 40SC** (buprofezin)	9.0–13.6 fl oz	27.2 fl oz	12	7	Immatures only. IGR. No more than 2 applications per season per crop or 4 per year.
	21A	**Magister** (fenazaquin)	24–36 fl oz	36 fl oz	12	3	No more than 1 application per year.
	23	**Oberon 2SC** (spiromesifen)	7.0–8.5 fl oz	25.5 fl oz	12	7	No more than 3 applications.
	28	**Exirel** (cyantraniliprole)	13.5–20.5 fl oz	61.6 fl oz	12	1	No more than 0.4 lb a.i./A per crop, either as foliar or soil applications.
	28	**Verimark** (cyantraniliprole)	6.75–13.5 fl oz	At planting: 13.5 fl oz Drip chemigation: 20 fl oz (or 10 fl oz if at-plant also used)	4	1	Both at-plant and drip chemigation. No more than 2 drip chemigation applications (1 if at-plant application is used).

[1] Mode of Action (MOA) codes for plant pest insecticides from the Insecticide Resistance Action Committee (IRAC) Mode of Action Classification v. 11.1 January 2024. Number codes are used to distinguish the main insecticide mode of action groups, with additional letters for certain subgroups within each main group. All insecticides within the same group (with the same number) indicate the same active ingredient or similar mode of action. This information must be considered for the insecticide resistance management decisions. U = unknown, or a mode of action that has not been classified yet.

[2] Always double-check labels regarding maximum application limits. Many labels are changing from a maximum rate per season (or crop cycle) to a maximum rate per year.

[3] Information provided in this table applies only to Florida. Be sure to read a current product label before applying any product. The use of brand names and any mention or listing of commercial products or services in the publication does not imply endorsement by UF/IFAS Extension nor discrimination against similar products or services not mentioned.

OMRI-listed: Listed by the Organic Materials Review Institute for use in organic production.

*Restricted use insecticide.

Table 13. Cucurbit fungicides ordered by disease and then FRAC group according to their mode of action. **Please refer to chapter 19 for information on biopesticides, including materials labeled for certified organic production.** Contact: Nicholas S. Dufault, UF/IFAS Department of Plant Pathology, Gainesville; or Pamela Roberts, UF/IFAS Southwest Florida Research and Education Center.

Fusarium wilt (watermelon)	3	(prothioconazole) **Many brands available:** Proline, Prothioconazole 4L, Prozio™ SC, others	5.7 fl oz	17.1 fl oz per year	7	0.5	No more than 1 soil application and 2 foliar applications per year.
	7 + 3	**Propulse** (fluopyram + prothioconazole)	13.6 fl oz	34.2 fl oz per year	7	0.5	No more than 1 soil application and 2 foliar applications per year. See label for harvesting guidelines.
	7+12	**Miravis Prime** (pydiflumetofen + fludioxonil)	11.4 fl oz	22.8 fl oz per year	1	0.5	For suppression only. Follow specific guidelines in the label.

[1] FRAC code (fungicide group): Numbers and letters are used to distinguish the fungicide mode of action groups. All fungicides within the same group (with the same number or letter) indicate the same active ingredient or similar mode of action. This information must be considered for the fungicide resistance management decisions. U = unknown, or a mode of action that has not been classified yet. Source: FRAC Code List; https://www.frac.info/ (FRAC = Fungicide Resistance Action Committee).
[2] Always double-check labels regarding maximum application limits. Many labels are changing from a maximum rate per season (or crop cycle) to a maximum rate per year.
[3] Information provided in this table applies only to Florida. Be sure to read a current product label before applying any chemical. The use of brand names and any mention or listing of commercial products or services in the publication does not imply endorsement by UF/IFAS Extension nor discrimination against similar products or services not mentioned.

Table 14. Nonfumigant nematicides for cucurbit crops in Florida. Contact: Johan Desaeger, UF/IFAS Gulf Coast Research and Education Center.

Product	Application Directions
Mocap 15G (a.i. ethoprop) (only labeled on cucumber)	Apply 13 lb/A (7 ft row spacing) or 2.1 lb/1,000 linear row ft in a band 12–15 in. wide on the row at planting. Prepare bed and knock off top to provide a level area for treatment. Mix with the top 2–4 in. of soil with mechanical equipment right after application. DO NOT use as a seed furrow treatment or allow granules to contact the seed. No more than 1 application per season.
Vydate L (a.i. oxamyl)	Apply ½–1 gal/A at planting, preferably via drip application. Make additional applications on a 10-to-14-day interval. No more than 2 gal/A per season. Reapplications at least 7 days apart unless a longer interval is stated. If an at-plant application of more than ½ gal/A is made, do not make more than 2 additional applications.
Nimitz (a.i. fluensulfone)	All applications must be incorporated either physically or via drip or overhead irrigation. Make preplant applications at a rate of 3.5–7 pt/A (56.0–80.0 fl oz/A) a minimum of 7 days before planting. Do not plant any unlisted crops into treated land for 365 days after application of the product. No more than 1 application per crop and no more than 112 fl oz/A per year (365 days). Provides control only for nematodes. Growers applying Nimitz must consult the product label to observe the plant-back (recropping) intervals for a variety of crops.
Velum (a.i. fluopyram)	Apply max 6.84 fl oz/A using only chemigation into root zone through low-pressure drip, trickle, microsprinkler, or equivalent equipment. Soil reapplications at least 5 days apart. No more than 13.7 fl oz/A of Velum (0.446 lb/A fluopyram) per year, regardless of formulation (Velum and/or Luna) or method of application (soil or foliar). For soil application, to limit the potential for development of disease resistance to this chemical class, the first foliar fungicide application after Velum should be a product from a different FRAC group.
Salibro (a.i. fluazaindolizine)	Apply 15.3–23 fl oz/A (0.5–0.75 lb/A a.i.) as preplant incorporated, preplant drip, or at-plant drip. Apply 7.7 fl oz/A (0.25 lb a.i.) for in-season drip chemigations. No more than 23 fl oz/A per calendar year. No more than 2 applications per calendar year. Reentry interval is 12 hr. Reapplications at least 28 days apart. Pre-harvest interval: Do not apply within 1 day of harvest.
Biological nematicides	See chapter 19.
Mocap and Vydate are insecticide/nematicides; Velum is a fungicide/nematicide; Nimitz is a true nematicide. Unlike fumigants, these products are not volatile and will move through the soil via water; depending on the water solubility, these products will have different recommendations as far as how to best apply them (see specific label recommendations); when nematode pressure is high, they may not be as consistently effective against root nematodes as the fumigants.	

Table 15. Fumigant nematicides for cucurbit crops in Florida. Contact: Johan Desaeger, UF/IFAS Gulf Coast Research and Education Center.

Nematicide	Broadcast Application[1]		In-the-Row Applications
	Gallons per Acre	fl oz/1000 ft/chisel-spaced 12" apart	
Telone II [2,3]	9–12	26–35	For any row spacing, application rates given may be concentrated in the row but shall never exceed the labeled maximum for broadcast applications. Consult the product label for additional detail.
Telone C-17 [2,3]	10.8–17.1	31.8–50.2	For any row spacing, application rates given may be concentrated in the row but shall never exceed the labeled maximum for broadcast applications. Consult the product label for additional detail.
Telone C-35 [2,3]	13–20.5	38–60	For any row spacing, application rates given may be concentrated in the row but shall never exceed labeled maximum for broadcast applications. Consult the product label for additional detail.
Pic-Clor 60	19–31.5	57–90	For any row spacing, application rates should never exceed the labeled maximum for broadcast applications. Consult the product label for additional detail.
Vapam HL	75	–	For drip or in-row chisel fumigation, consult product label for proportionately reduced overall rates, drip concentration, and flow-modifying directions and procedures.
KPam HL	60	–	For drip or in-row chisel fumigation, consult product label for proportionately reduced overall rates, drip concentration, and flow-modifying directions.
Allyl Isothiocyanate (AITC) Dominus	40	–	For drip or in-row fumigation and crop termination, consult product label for overall rates, drip concentration, and other flow-modifying directions.

[1] Gallons/acre and fl oz/1000 ft provided only for mineral soils. Higher rates may be possible for heavier-textured (loam, silt, clay) or highly organic soils.
[2] All of the fumigants mentioned are for retail sale and use only by state-certified applicators or persons under their direct supervision. New supplemental labeling for the Telone products must be in the hands of the user at the time of application. See new label details for additional use restrictions based on soil characteristics, buffer zones, requirements for Fumigant Management Plans (FMP) and personal protective equipment (PPE), mandatory good agricultural practices (GAPs), product and applicator training certification, and other rate-modifying recommendations with use of highly retentive mulch films.
[3] Higher application rates are possible in the presence of cyst-forming nematodes.
Rates are believed to be correct for products named and similar products of other brand names, when applied to mineral soils. Higher rates are required for muck (organic) soils. However, the **grower** has the final responsibility to see that each product is used legally; **read the label** of the product to be sure that you are using it properly.
